

S. Michelson Ltd. is a highly regarded construction company that has been building in Israel for almost 40 years.

In recent decades, it has added dozens of residential buildings to the Israeli landscape, mainly in the Sharon region. And not just housing – it has also been responsible for office buildings: Millennium House at the northern entrance of Ra'anana is a good example of S. Michelson's experience, capabilities and skills.

Purchasers of S. Michelson's projects become satisfied customers, because the company builds to the highest possible professional standards.

"Customer satisfaction is our top priority", they emphasize in S. Michelson. Indeed their clients trust them so much that most of the company's marketing is simply a matter of personal recommendation.

That's why most of the apartments in the new residential building going up at 10 Borochov Street in Ra'anana are already sold. Only a few apartments are still available. The site is superb: a quiet neighborhood, yet in the center of the city, so that the city's main facilities and services are only a short walk away.

The apartments are, of course, built to a high standard, and each enjoys the benefit of a sun balcony, underground parking and a store-room.
